**Subject:** Injustice In Microsoft case

To Whom it may concern,

" The DOJ had previously found Microsoft to be a monopolist, but the settlement included no punishment for past actions and left doubt as to its protections against future monopolistic practices."

AT&T was broke up, Standard Oil was broke up, and it has been US government policy to break up companys that hold monopolies. Microsoft has been termed a monoploy and should be broken up. Microsoft also feels that they are above the law and can buy their way out of breaking the laws of the United States of American. No company should be able to violate the laws of the US and get away withit just because they can keep having lawyers come up with excusess that do not even address the wrong doing of the company.

Justice needs to be served and the un-American monoploy of Microsoft needs to end. We have no choice as consumers on what operating systems we can run and what web browsers we can use. Microsoft always manages to fix its software so other company's software stops working. This needs to end.

Thank you for your time,
